

Weekly Progress Report

Student Name: Farooq Omar Issa Abdullah	Student ID No: 0226499
Date: 26 Jul-1 Aug 2026	Report No: 2
Name of Institution: PayOne	Department: Software Development
Training Site: Al Amira Basma St. 194, Amman, Jordan	Tel. (At Site): 0798110930
Activities Completed: - Designed the PostgreSQL user schema and environment-based database configuration. - Implemented registration and login with BCrypt password hashing. - Created JSP forms using JSTL output escaping and HTML validation attributes. - Introduced the User model, DAO interface and Hibernate DAO implementation. - Replaced direct JDBC work with Hibernate sessions and transactions.	
Activities in Progress: - Expanding the protected home page into a practical user-management screen. - Refining entity mappings, DAO responsibilities and reusable validation. - Testing database connectivity and Hibernate schema validation.	
Issues/Recommendations: Keeping SQL/persistence code out of the servlets was initially difficult. The solution was a layer plus HibernateUtil, with prepared/bound parameters and transactions managed in one persistence component.	
Comments: The application now had a clear MVC-style structure: Servlets for requests, JSP for views, Hibernate DAO for persistence and PostgreSQL for durable data.
