

Weekly Progress Report

Student Name: Farooq Omar Issa Abdullah	Student ID No: 0226499
Date: 23-31 Aug 2026	Report No: 6
Name of Institution: PayOne	Department: Software Development
Training Site: Al Amira Basma St. 194, Amman, Jordan	Tel. (At Site): 0798110930
Activities Completed: - Added a shared audit component and searchable admin audit-log screen. - Logged successful/failed login, user, password, reset, unlock and role actions. - Added five-attempt/15-minute account lockout and administrator unlock. - Added server-side user pagination, username/email search and whitelisted sorting. - Added email-based forgot-password flow with 15-minute, single-use hashed tokens. - Moved authentication, password, audit and directory rules into service classes. - Recreated and validated the clean PostgreSQL schema; 11 tests and WAR build passed.	
Activities in Progress: - Configuring the approved SMTP provider and performing an end-to-end email delivery test. - Collecting supervisor feedback and preparing final internship documentation. - Monitoring audit, lockout and reset-token behavior during acceptance testing.	
Issues/Recommendations: The new features shared rules across several endpoints. Dedicated service classes now own business logic, DAOs own persistence and servlets only coordinate HTTP input/output. Res tokens are stored only as SHA-256 hashes and consumed under a database lock.	
Comments: The final system combines layered design, secure password handling, RBAC, auditability, protection and scalable user browsing. All completed source was tested and pushed to the main branch.
